

# QR Code based Car Parking Assistance in Android

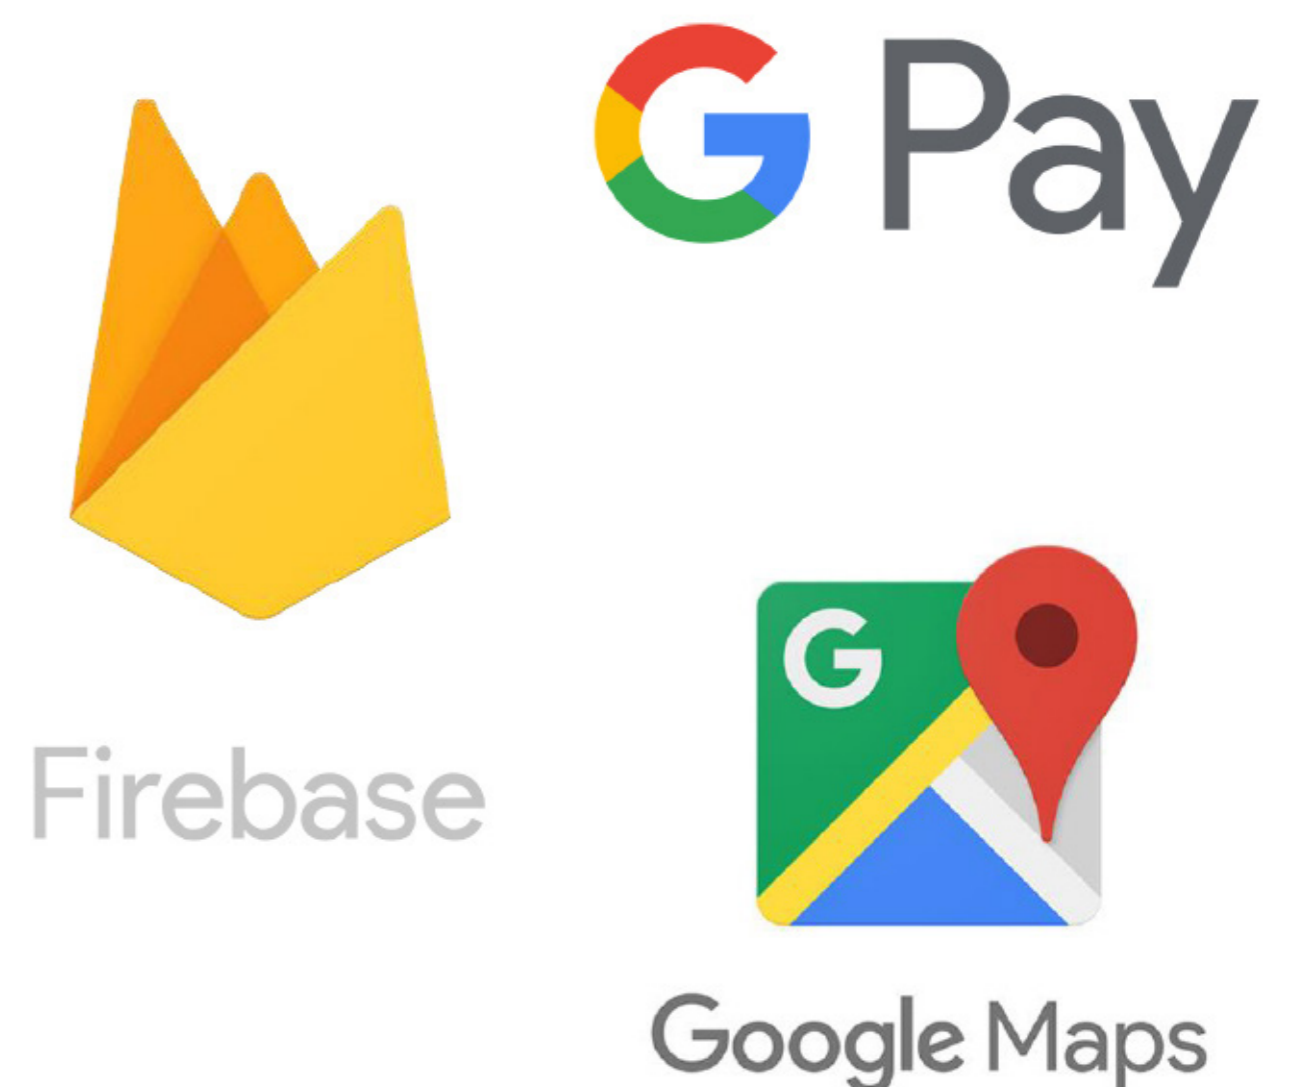

## What is it?

This application assists you in car parking experience, by:

- ✓ giving overview of parking lot condition (availability)
  - ✓ remind users where they park their car
  - ✓ navigate through the parking lot
- with the goal of presenting a smoother and more hassle-free experience

## Implemented with:

## Why do we need it?

Drivers waste a lot of time searching for parking spot. A study shows drivers waste an average total of nearly four days every year looking for parking spaces in Britain. They also tend to forget where they parked. Survey finds more than one third regularly forget where their car is parked.
